

## Health Clipboard Activity 13

## Body System Flashcards

**For the whole class:** Choose a student volunteer to pick one card out of the box. He or she reads one side of the card (either the name of a body system or its function). Have a student identify the body system described or describe the function of the body system. The student who volunteers the correct response then picks the next card. If time allows, return all cards to the box and play the game again.

## Health Clipboard Activity 14

## Skin, Bone, and Muscle Jump

**For small groups:** Ask each group to make and recite a 1-minute song set to a jump rope rhythm. Have the songs describe ways people can take care of their bones, muscles, or skin to keep them healthy. Have each group choose a body system to write about (skeletal, muscular, or skin) and refer to the bulleted items on pages B9, B11, and B13 for help.
